a. taking ☐

b. takes ☐

c. take ☐

d. took ☐

Global warming refers to the increase of the earth's average temperature due to increasing amounts of greenhouse gases in the atmosphere.

Carbon dioxide is the biggest contributor to greenhouse gas emissions. Scientists agree that the burning of fossil fuels like oil and coal causes greenhouse gases such as carbon dioxide to escape into the air and act like a warm blanket over the earth. There are already some changes happening because of global warming.

Sea level is rising and some animals are moving to new homes because their natural habitat is disappearing.

?What is global warming

اختر أحد الخيارات
