

**Question 1:**

(21marks)

1. There are the following statements that are given below, which of them are correct about the OSI model?

- A. The OSI model is an implemented model that describes only network topologies.
 B. The OSI model is an implemented model that describes only network protocols.
☒ C. The OSI model is a reference model that describes the network functionalities.
 D. None of the above.

2. Which layer of the OSI model is responsible for routing?

- A. Data Link Layer ☒ B. Network Layer C. Transport Layer D. Physical Layer

3. Which of the following are functions of the application layer?

- A. Mail Services B. File Transfer C. Virtual terminals ☒ D. All of the above

4. HTTP works on which layer of the OSI model?

- A. Network layer B. Transport layer C. Presentation layer ☒ D. Application layer

5. There are the following statements that are given below, which of them are correct about HTTP?

- A. HTTP stands for HyperText Transfer Protocol. B. HTTP follows client/server architecture.
 C. HTTP is used to transfer text, audio, image, etc. D. The default port for HTTP is 80.

1. A and B 2. A and C 3. A, C, and D ☒ 4. A, B, C, and D

6. Which of the following are the types of HTTP header?

- A. General header B. Entity header C. Request header D. Response header
☒ 1. A, B, C, and D 2. C and D 3. A, B, and C 4. A and B

7. There are the following methods that are given below, which of them are correct methods used in an HTTP request?

- A. GET B. POST C. CONNECT D. DELETE
 1. A and B 2. A, B, and C ☒ 3. A, B, and D 4. A, B, C, and D

8. There are the following statements that are given below, which of them are correct about HTTPS?

- A. HTTPS is the extended version of HTTP.
 B. HTTPS is used for secured communication between the web browser and web server.
 C. HTTPS also provides anti-virus security for the website.
 D. HTTPS stands for HyperText Transfer Protocol Secure

1. A and B ☒ 2. A, B, and D 3. A and C 4. A, B, C, and D

9. There are the following statements that are given below, which of them are correct about the advantages of HTTPS?

- A. Data Integrity B. Encryption based security C. Antivirus protection D. Search Engine Optimization

- ☒ 1. A, B and D. 2. A and C 3. A, B, and C 4. A, B, C, and D

10. Which of the following is not the component of the SMTP protocol?

- A. Mail Transfer Agent B. User Agent ☒ C. Server Agent D. None of the above

11. DNS database contains ____

- a) name server records
 b) hostname-to-address records
 c) hostname aliases
☒ d) all of the mentioned

12. If a server has no clue about where to find the address for a hostname then ____

- ☒ a) server asks to the root server
 b) server asks to its adjacent server
 c) request is not processed
 d) none of the mentioned

13. Which one of the following allows client to update their DNS entry as their IP address change?
☒ a) dynamic DNS b) mail transfer agent c) authoritative name server d) none of the mentioned
14. the domain name system is maintained by ____
☒ a) distributed database system b) a single server c) a single computer d) none of the mentioned
15. What is used to control DNS data replication scope?
 a) the Mail exchanger (MX) record b) in the Start of Authority (SOA) record
☒ c) application directory partitions d) in a highly-secure environment
16. Network in which every computer is capable of playing the role of client, server or both at the same time is called
 a) peer-to-peer network ☒ b) local area network c) dedicated server network d) wide area network
17. The purpose of a computer network is _____.
 A) Sharing information or files or applications B) Sharing of resources like printers, scanners
 C) Monitoring and controlling of devices in the network from a central location ☒ D) All the above
18. In a peer to peer computer networking architecture, each computer acts as a _____.
 A) Server B) Client C) Both server and client depending the need ☒ D) All
19. In a Client-Server computer network or architecture, all nodes can ____ data.
 A) send B) receive C) send and receive D) None
20. To join the internet, the computer has to be connected to a
 a) internet architecture board b) internet society ☒ c) internet service provider d) none of the mentioned
21. What is the process of transferring files from the internet to computer memory called?
 a) Uploading ☒ b) Downloading c) Bookmarking d) Hyperlinking
22. Which of the following is NOT a type of broad band internet connection ?
 a) Cable b) DSL ☒ c) Dial-up d) Satellite
23. The design of the network is called the network
☒ a) architecture b) server c) transmission d) type
24. Which term identifies a specific computer on the web and the main page of the entire site
☒ a) URL b) Web site address c) Hyperlink d) Domain name
25. DSL is an example of a(n) connection.
 a) network b) wireless c) slow ☒ d) broadband
26. Internet works on ____
 a) packet switching b) circuit switching ☒ c) both packet and circuit switching d) data switching
27. Which network is highly secure between a Peer-to-Peer or a Client-Server?
 a) Peer-to-Peer ☒ b) Client-Server

28. There are following statements that are given below, which of them are correct about SMTP?
- A. It is an application layer protocol.
 - B. It is a connectionless protocol.
 - C. SMTP stands for Simple Mail Transfer Protocol.
 - D. SMTP is a text-based protocol.
1. A and B 2. A and C 3. A, C, and D 4. A, B, and C
29. There are following statements that are given below, which of them are correct about IMAP?
- A. The IMAP is used to manipulate email messaging without downloading it on a local machine.
 - B. It is used to access multiple mailboxes concurrently.
 - C. IMAP enables users to search for emails.
 - D. All the above
1. A and B 2. A and C 3. B and C 4. D
30. There are following statements that are given below, which of them are correct about POP?
- A. POP stands for Post Office Protocol.
 - B. POP is used to support a single client.
 - C. POP supports offline access to messages.
 - D. All of the above
1. A and B 2. A and C 3. B and C 4. D
31. A host address in a URL can be?
- A. An IP address
 - B. A Domain Name
 - C. Both
 - D. None
32. There are following statements that are given below, which of them are correct about email addresses?
- A. E-mail addresses cannot be duplicated
 - B. E-mail address contains the domain name and user name.
 - C. In the e-mail address, the user name and domain name are separated by the dollar symbol.
 - D. E-mail addresses are case sensitive.
1. A and B 2. B and D 3. A, B and C 4. A, B, and D
33. A host address in a URL can be?
- A. An IP address
 - B. A Domain Name
 - C. Both
 - D. None
34. User datagram protocol is called connectionless because
- a) all UDP packets are treated independently by transport layer
 - b) it sends data very quickly
 - c) it sends data as a stream of related packets
 - d) it is received in the same order as sent order
35. Transport layer protocols deals with
- a) application to application communication
 - b) process to process communication
 - c) node to node communication
 - d) routing

Answer:
